Job Title: Machine Learning Engineer

Location: Bangalore, India
Experience: 1–3 years
Job Type: Full-time
Industry: Artificial Intelligence / Software

Job Description
We are looking for a talented Machine Learning Engineer to design and deploy ML models that power co

Responsibilities
- Design, develop, and deploy machine learning models in production.
- Preprocess and analyze large-scale datasets to extract meaningful insights.
- Collaborate with data engineers and software developers to integrate models into the product.
- Monitor, maintain, and retrain models as needed to ensure performance.
- Conduct experiments, perform model evaluation using metrics like precision, recall, AUC.
- Stay updated with the latest trends in AI/ML (transformers, LLMs, etc.).

Requirements
- Bachelor's or Master's in Computer Science, Data Science, or related field.
- 1–3 years of experience in applied machine learning or data science.
- Strong Python skills; experience with ML libraries (scikit-learn, TensorFlow, PyTorch).
- Proficient in data wrangling using pandas, NumPy, and visualization tools.
- Familiarity with ML lifecycle tools (MLflow, DVC, SageMaker, etc.).
- Understanding of MLOps principles and version control (Git).
- Experience with REST APIs and deploying models to cloud (AWS/GCP) is a plus.

Nice to Have
- Experience with NLP, transformers, or LLMs like Mistral, BERT, or GPT models.
- Familiarity with vector databases (FAISS, Pinecone).
- Knowledge of LangChain, RAG architectures, or prompt engineering.
